CHAPTER I: INTRODUCTION

Overview

iPay88 is the first online payment gateway provider in Malaysia that helps online merchants to connect their store with PayPal while they are using iPay88 payment services. Now iPay88 offering PayPal Checkout as an additional payment method to iPay88 merchant, providing online customers with comprehensive of payment options.

How it Works?

PayPal Checkout through iPay88 makes it quick and easy for your online customers to pay securely with a few clicks. The customer is directed from your shopping basket to their PayPal login to approve and finalize their purchase.

How This Benefit iPay88 Merchant?

- **Consolidated Report** - PayPal payments reporting available in the iPay88 Real Time Online Report
- **Simple** - Fully integrated payment processing
- **Straight Forward** - Simplified website integration
- **Easy** - No separate integration to PayPal required

Requirements

You will need to:

- accept supplemental terms and conditions with iPay88,
- accept a new User Agreement with PayPal and have a new PayPal account dedicated for use with iPay88 (existing PayPal accounts are not suitable).

Who Should Use This?

iPay88 merchants that:

- Facing difficulty to integrate their online store with PayPal
- Planning to integrate their store with PayPal

Note:

1. The PayPal payment method is only available in conjunction with other payment methods, it is not available as the only payment method.
2. The merchant needs to settle the payment with PayPal directly. iPay88 just provides payment solution for PayPal account holder.

CHAPTER II: STEPS OF INTEGRATION

Step 1: Open PayPal Account

Go to <https://www.paypal.com/my/mrb/pal=HLKQBPF3H2TA> and sign up your own PayPal account. Please skip this step if you already have PayPal account.

Step 2: Grand 3rd Party API Access

(a) Login your PayPal account

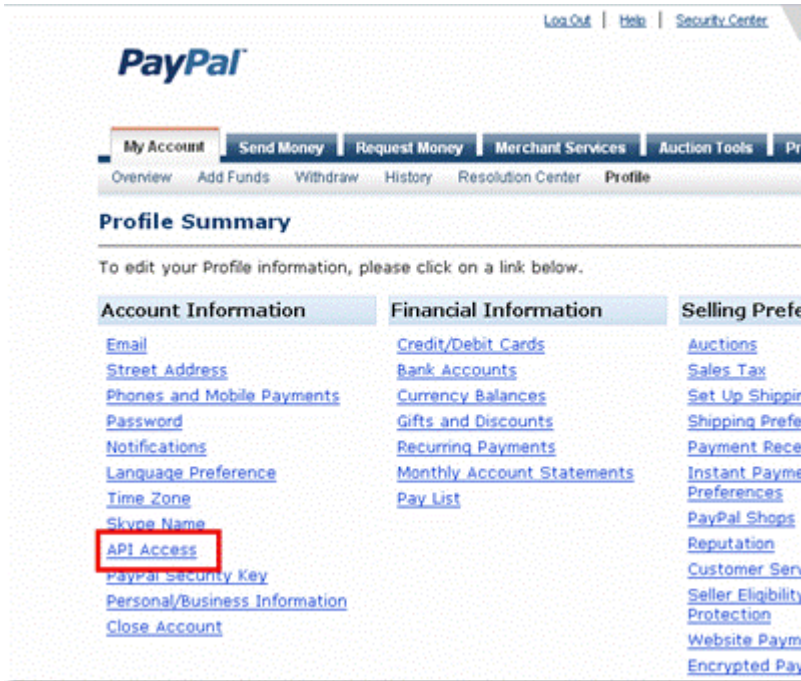

(b) Select the "Profile" tab

(c) Select “API Access”

(d) Select “Grant API Permission” (or “View or Change API Permissions” if the account has made this configuration previously)

(e) Enter API account username “marketing_api1.ipay88.com.my” and check “Express Checkout” access level. Then click submit. (Please ignore the “Configure a custom API authorization” as highlighted in red rectangular as below)

Third-Party API Instructions for help completing this page. Learn more about [PayPal API Concepts and Terminology](#) page.' There is a text input field for 'Enter API account username:' with a question mark icon. Below that, there is a section 'Select Your API Access Level:' with four radio button options: 'Direct Payment', 'Express Checkout', 'Reporting and Backoffice APIs', and 'Authorization and Settlement APIs'. At the bottom, there is a link 'Configure a custom API authorization.' which is highlighted with a red rectangular box."/>
